

## Spreading His Wings: Just in Time to Fly Home

Pasco, WA --- A well-traveled man with a “dart and a map,” makes his way back to his roots, all in the name of family and always striving for nothing less than Being Great, along the way! Meet Service Manager Joshua Meyer. Dynamic, interesting, courageous, nor adventurous even begin to scratch the surface of a man whose family settled and started an entire town (Troy, MT) and who has seen and lived in almost every corner of our country.

One of the few true Cleveland Brown fans to live outside of the state of Ohio, Josh and his wife Valeria dedicate their weekends to their favorite sport and team (at least September through January), and then they escape to the great outdoors with their “children on a leash,” Bruiser and Kennedy. Since joining the Pacific Mobile team in 2012, Josh’s compassionate, self-motivating way of going about business serves the company and its customers. With that said, his superiors quickly noticed and promoted him to Service Manager, allowing him to help other employees and the overall mission of PMSI each and every day.

Prior to joining the Pacific Mobile team, Josh’s stops included everything from Montana to the beaches of Florida, back west to San Diego and its beaches, eventually to return to the Great Northwest. He takes great pride as a major part of the Lead Abatement Project on the Award-Winning, more than two-mile long Coronado Bridge in San Diego. Lucky for us, the snow, rain and clouds could not keep him away forever. Josh says, “My life home was sending a signal I could not ignore any longer and decided to pack up and head north.” Josh’s hard-working nature started at the young age of 16 as a log loader, provided him an opportunity to see much of the United States working in construction, running his own crews and landing his dart, close to where it all started. Pacific Mobile Structures looks to 2016 lucky this self-proclaimed “gypsy soul” settled down here, ready to serve its customers into the New Year and beyond.
