

Project Profile:

Hoquiam School District

3,584-Square-Foot, Single-Story, Administrative Building
Located in Hoquiam, WA

DETAILS:

The Hoquiam School District needed a new administrative building to operate as their district office. They needed the building to be ready for use by the end of summer. With a relatively small population, the Hoquiam School District had a limited budget to work with and looked to modular construction in order to meet their needs quickly and within budget.

TIME TO COMPLETE:

45 days from delivery to occupancy.

SPECIAL FEATURES:

Hoquiam sits right on the Pacific Ocean and experiences over 100 inches of rain a year. It was essential that Pacific Mobile use higher-end products that are able to withstand the harsh elements presented, such as non-corrosive paint and a metal roof. The building itself sits on a very steep hill and a stem wall foundation was used to ensure the building sat at grade level. The front of the building is embellished with stone wrapping to give the appearance of standard stick-built construction.

- Conference Room
- 9 Private Offices
- Reception
- Staff Breakroom
- 2 Restrooms
- File Room
- Mail and Supply Room

“The building is at grade-level and has a really nice stone wrapping around the front. It’s so well constructed and well-designed that if you walked into the building, you probably wouldn’t know that it’s modular construction.”
-Patrick Allen, Major Projects Sales Consultant
