

Interim ATO Trailers – PDX T Core Expansion

9,920-square-feet of Office,
Restroom, & Janitorial Buildings

Located in Portland, OR

Time to Complete: 24 Floors – 101 Days from delivery to occupancy.

Project Overview:

Portland Airport was in immediate need of administration offices and breakroom space complete with a restroom and janitorial rooms, while the airport undergoes a remodel over a period of five years. Pacific Mobile provided six buildings including a 30X40, 40X88, 40X40, two 20X40 office buildings and a 50X40 combined office building, restrooms, and janitorial rooms. The modular buildings offered Portland Airport the space they needed on a tight schedule, in a tight space, fully customized and ready for use much faster than stick-built construction could provide. Each of the six buildings are unique, adhering to the requirements of each airline. Some of the buildings cater to minimalistic design, while others are large with breakrooms. One of the buildings was outfitted with on-brand carpet and flooring specified by one of the airlines.

Highlights:

- Fully customized
- Restrooms
- Janitorial Rooms
- Both large and minimalistic
