

Silver Creek Church

5,392-Square-Feet of Office
and Classroom Space

Located in Silverton, OR

Time to Complete: 8 Floors – 7 Floors - Three days from delivery

Project Overview:

Silver Creek Church needed additional space for pantry storage and classroom facilities. They opted for a modular solution due to its faster construction schedule and customization options. Choosing to collaborate with Pacific Mobile Structures was a natural decision, given their capability to deliver precisely what Silver Creek Church required, when they needed it, and in the manner they desired – all with ultimate speed and convenience.

Over the course of ten years, Pacific Mobile Structures provided three buildings to Silver Creek Church. In 2013, they supplied a 28X64 classroom, followed by a 36X60 office with a restroom in 2019, and, finally, a 24X60 mobile office in 2023. These buildings were strategically positioned directly across from and adjacent to the existing church structure.

Both the 36X60 office with a restroom and the 24X60 mobile office were configured to mirror the layout of the original 28X64 classroom provided in 2013. All structures boast cool white vinyl wall coverings (VWSR) in their interiors, with half lite windows installed on the doors. Externally, the buildings feature T1-11 siding with matching skirting, along with horizontal sliding windows for easy access. The 24X60 mobile office is equipped with ADA ramp access for enhanced accessibility.

For over a decade, Silver Creek Church has enjoyed a trusted partnership with Pacific Mobile Structures, relying on them for all their modular construction needs.

Highlights:

- Cool White VWSR
- Half Lite Door Windows
- T1-11 Siding with Skirting
- Horizontal Sliding Windows
- ADA Ramp Access
